

MATCO Platform

Advanced materials for construction, civil engineering, coastal engineering

This platform is a part of the PAPU Instrumental Service Center: [UPPATECH](#).

It is linked to the SIAME laboratory and is led by H el ene CARRE.

Fields of application

- * Environment
- * Geosciences
- * Energy
- * Materials

Themes and skills

- * Characterization of fresh cementitious materials
- * Characterization of granular materials, soil
- * Mechanical characterization of materials
- * Mechanical characterization of soils
- * Manufacturing, machining of concrete and mortar
